divitap1281@gmail.com | +1 (519) 992-7833 | Kitchener, Ontario, CA | [linkedin.com/in/philomina-divita](https://www.linkedin.com/in/philomina-divita)

PROFESSIONAL SUMMARY

Technical Support Engineer with 4 years of experience delivering technical support for SaaS platforms in remote, fast-paced environments. Proven ability to troubleshoot complex software issues, conduct root cause analysis on large datasets, and drive cross-functional resolutions with engineering, product, and sales teams. Experienced in managing high-volume support queues while maintaining 98%+ SLA compliance and top-tier customer satisfaction scores. Skilled in REST APIs, SQL data analysis, geospatial concepts, and AI-enabled workflows. Comfortable serving as a technical liaison between customers and internal teams, translating user feedback into product improvements and authoring clear documentation that reduces repeat tickets.

SKILLS

Programming Languages: Python, SQL, JSON, REST API scripting, cURL, HTTP methods

Data Analytics: Large dataset analysis, anomaly detection, trend identification, pattern recognition, transportation metrics, mobility data, data quality review, strong problem-solving skills

Geospatial Tools: ArcGIS, QGIS, geospatial data analysis, GIS concepts

APIs & Technical Tools: REST APIs, Postman, cURL, authentication troubleshooting, API integration support, technical troubleshooting

Support & Ticketing: Intercom, Zendesk, Jira, Confluence, ServiceNow, Salesforce, SLA management, escalation workflows, operational support

SaaS & Product Support: SaaS platform support, technical services, customer support, customer interaction, customer-facing communication, customer onboarding, consulting

Documentation: Support documentation, knowledge base authoring, FAQs, training materials, technical documentation

Core Strengths: Detail-oriented, organizational skills, verbal and written communication skills, empathy for users, cross-functional collaboration, remote-first environments

AI & Emerging Tools: AI-enabled workflows, data annotation, model output quality review, edge case identification

Networking: TCP/IP, DNS, DHCP, VPNs, firewalls, LAN/WAN, network diagnostics

PROFESSIONAL EXPERIENCE

Technical Support Engineer | **Transcom** Ontario, Canada, Remote *July 2024 – Present*

- Handled 20 to 25 inbound support tickets daily via Intercom, in-app chat, phone, and email, consistently maintaining 98%+ SLA compliance across all channels and scoring above the team average on customer satisfaction surveys.
- Performed in-depth root cause analysis on complex software issues by reviewing application logs, backend records, and error patterns, identifying recurring failure modes that contributed to a 20% reduction in repeat tickets over six months.
- Troubleshoot REST API integration issues end to end by inspecting request and response payloads, validating JSON structure, and resolving authentication failures, cutting integration-related escalations to engineering by approximately 30%.
- Acted as a technical liaison between customers and internal product and engineering teams, translating recurring user feedback and bug reports into structured, actionable feature requests and Jira tickets with detailed reproduction steps.

AI Data Annotation Specialist | **Outlier AI** Ontario, Canada, Part-time Remote *November 2025 – Present*

- Review and annotate AI training data including text, images, and workflow scenarios against detailed accuracy and quality guidelines, directly contributing to improvements in model reliability and output quality.
- Identify edge cases and data inconsistencies across large annotation batches, providing structured and reproducible feedback to help downstream teams improve model behavior and reduce error rates.
- Apply analytical judgment to distinguish between correct model outputs and subtle failure modes, building hands-on expertise in AI-enabled tools and quality assurance processes relevant to modern SaaS and data workflows.

Services Support Representative | **Optima Communications** Ontario, Canada *March 2024 – July 2024*

- Investigated and resolved billing data discrepancies across client accounts, maintaining 99% accuracy in financial records and achieving a 15% reduction in invoicing errors through systematic review and correction workflows.

- Managed high-volume client account requests with attention to detail, following established support processes to ensure consistent outcomes and timely resolution within defined service windows.
- Collaborated with internal teams to identify root causes of recurring billing issues and implement corrective measures, improving data integrity and reducing escalations.

Technical Support Engineer | **Kelly Services** Ontario, Canada, Remote *July 2022 – March 2024*

- Delivered technical product support for a SaaS platform via Zendesk across in-app chat, phone, and email, resolving platform access issues, workflow failures, and API integration errors while consistently meeting SLA and quality targets.
- Investigated product and API integration issues by analyzing request and response logs and reviewing configuration settings, improving first-contact resolution rate by approximately 15% and reducing time spent on recurring escalations.
- Built and maintained troubleshooting guides and knowledge base articles in Confluence, enabling the support team to resolve repeat issues faster and reducing average handling time for common cases.
- Escalated complex bugs to Product and Engineering via Jira with detailed reproduction steps, log excerpts, and diagnostic findings, reducing escalation turnaround time by approximately 25% and improving engineering triage efficiency.

EDUCATION

Master of Engineering, Electrical & Computer Engineering | **University of Windsor** Windsor, Canada *Jan 2021 – June 2022*

Bachelor of Engineering, Electronics & Communication Engineering | **PES University** Bangalore, India *Aug 2016 – Sept 2020*
